EDUCATION

Graphic Era Deemed to be University

Bachelor of Technology in Computer Science Engineering

Dehradun, Uttarakhand, India

Aug 2023 – Jul 2027

Mount Litera Zee School

Senior Secondary Education

Agra, Uttar Pradesh, India

2020 – 2022

PROJECTS

RL Derivative Hedging Platform

Jan 2026 – May 2026

Python, FastAPI, PyTorch, Stable-Baselines3, Next.js, Docker, Kubernetes, Redis, PostgreSQL

- Built an enterprise-grade quantitative finance platform integrating RL agents for derivative pricing and hedging using Black-Scholes, Monte Carlo, and Heston stochastic volatility models.
- Engineered FastAPI backend with real-time WebSocket telemetry, Redis pub/sub, PostgreSQL, Celery workers, and MLflow experiment tracking for asynchronous RL training pipelines.
- Deployed with Docker Compose and Kubernetes; integrated Prometheus, Grafana, and NGINX; built multi-page Next.js dashboard for live portfolio and risk analytics.
- Implemented continuous-action hedging agents via Stable-Baselines3 with Greeks computation, PnL analytics, drawdown analysis, and a backtesting engine for strategy workflows.

EarningsLens – Earnings Call Sentiment Analyzer

Sep 2025 – Nov 2025

Python, FastAPI, HuggingFace Transformers, PyTorch, React 18, TypeScript, Docker Compose

- Fine-tuned allenai/longformer-base-4096 on earnings call transcripts for 3-class sentiment classification with key phrase extraction via attention visualization.
- Built FastAPI inference server with event-study backtester correlating sentiment scores against post-earnings price movements using yfinance.
- Developed React 18 + TypeScript dashboard with Recharts for sentiment visualization and Zustand for state management.
- Achieved weighted average F1 score of 0.41 on 600 transcripts and improved Positive class recall to 0.59.

QueueX – Distributed Task Orchestration System

Mar 2025 – Jun 2025

Node.js, TypeScript, Express.js, PostgreSQL, Prisma ORM, Redis, BullMQ, Docker

- Built a distributed task execution platform processing 10,000+ asynchronous jobs using Redis and BullMQ.
- Implemented retries and lifecycle tracking across five job states, achieving 99%+ reliability.
- Developed secure REST APIs with Express.js, PostgreSQL, Prisma ORM, JWT authentication, and Docker.

ACHIEVEMENTS

leetcode.com/u/krshydv

LeetCode Guardian: Achieved a Peak Contest Rating of **2217**, ranking in the **Top 0.83%** of users globally.

LeetCode Knight: Current Contest Rating **2041**, ranking in the **Top 2.06%** of users globally.

Solved 350+ Data Structures & Algorithms problems across LeetCode.

Top Global Ranks: **13** (Biweekly Contest 185), **52** (Biweekly Contest 179), **106** (Weekly Contest 495).

CERTIFICATIONS

Developing Generative Artificial Intelligence Solutions | Amazon Web Services (AWS)

Oct 2025

- Explored foundation models and enterprise generative AI workflows.

Deloitte - 2025/26 Data & Analytics Vacationer Program | Deloitte via Forage

Aug 2025

- Completed practical tasks in Data Analysis and Forensic Technology.

Introduction to Python Programming | University of Pennsylvania via Coursera

Aug 2025

- Completed Python programming fundamentals.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (PostgreSQL), JavaScript, TypeScript, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, Express.js, FastAPI, PyTorch, HuggingFace Transformers, Stable-Baselines3, NumPy, Pandas

Developer Tools: Git, Docker, Kubernetes, Redis, PostgreSQL, Prisma ORM, MLflow, Prometheus, Grafana, VS Code, PyCharm

Cloud & DevOps: AWS, Docker Compose, Kubernetes, NGINX, Celery, CI/CD Pipelines

Concepts: Reinforcement Learning, NLP, Quantitative Finance, Distributed Systems, Data Structures & Algorithms, OOP, DBMS, REST APIs, WebSockets
